

Market Data on EEX

Transparency matters

eex

Market Information Services

Market data regarding all products traded on the EEX and EPEX SPOT or registered for OTC clearing are available in an electronic format as Info-Products. In addition to this, the data on wind and solar energy as well as the data regarding conventional power plants from the “Transparency in Energy Markets” transparency platform are offered as Info-Products.

Info-Products >

End-of-Day Data	Delayed Data
Daily provision of volumes and prices after the end of trading	Daily provision of volumes and prices with a 15- to 20-minute delay
Comprises final settlement prices for all trading products (settlement)	Comprises prices of all trades for all trading products (tick data)
Aggregated representation of individual trades	Per-second representation of individual trades
Formats: CSV/XLS/XML	Formats: XML

Historical Data	Current Data	Historical Data and Current Data
Comprise all data until the end of the previous year	Comprise the current and the previous year	Comprise all data including the current year

SMS	Reports	RSS-Feed
Daily provision of SMS with prices from the EEX and EPEX SPOT markets	PDF reports with detailed information on power plant data or CO ₂ emissions	Information on planned and unplanned non-availabilities of power plants without a delay

Right of use >

Info-User	Info-Vendor	SMS, Reports, RSS-Feed

	French Futures	Prices for French front contracts (base, peak)	
Natural Gas	Natural Gas Spot	Prices and volumes for GASPOOL, NCG and TTF	
	Natural Gas Futures I	Prices for front contracts for GASPOOL, NCG and EGIX	
	Natural Gas Futures II	Prices for contracts with subsequent maturities for GASPOOL and NCG	
Emission Rights	Emission Rights	Prices for emission rights on the Spot and Derivatives Market (EUA, CER), primary market auctions (EUA)	

Daily Transparency Report > The Daily Transparency Report contains central information regarding the availability of power plants and regarding the planned and actual feed-in by conventional power plants and renewable energies. This information is processed and plotted in graphs and, thus, permits simple analysis. The Daily Transparency Report is a daily newsletter in the PDF format which comprises the German/Austrian market area. Against the backdrop of high data coverage, it contains the following information:

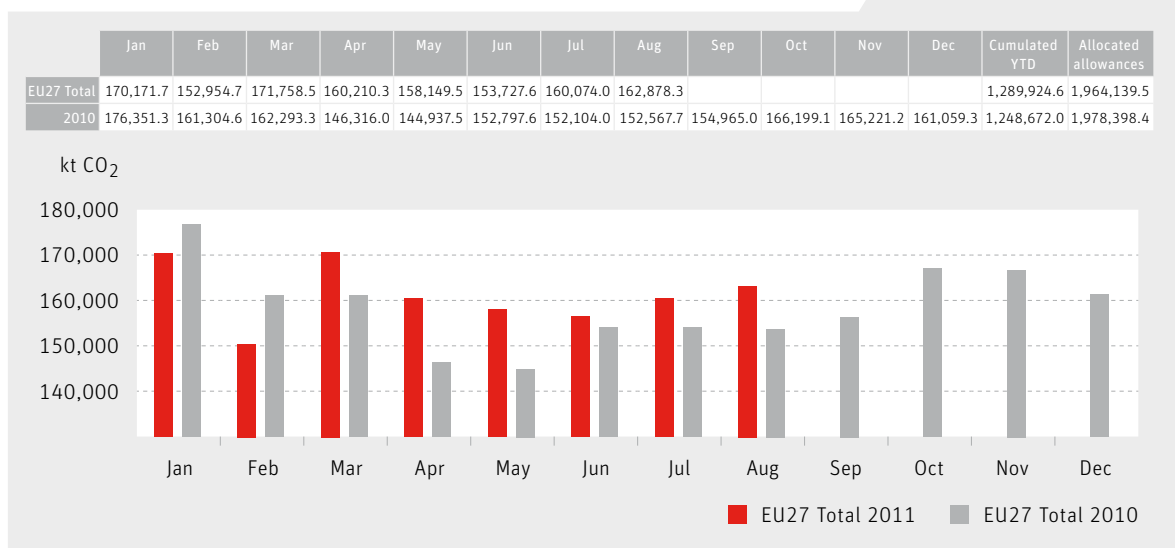

- Fundamental data from the field of power generation,
- Availabilities, outages and actual generation.

Example: Actual production of renewable energy >

Monthly Carbon Report > The Monthly Carbon Report is based on emission figures of various companies and supplements the publication of the effective CO₂ emission data (VET), which is only published on an annual basis. This helps to close an information gap and enhance transparency for analyzes, traders and EUA officers in companies. The MCR data are based on a contributor model which was developed together with important companies.

Example: 2011 effective figures in kt CO₂ and comparison with 2010 values >

About EEX

The European Energy Exchange (EEX) is the leading energy exchange in Europe. It develops, operates and connects secure, liquid and transparent markets for energy and related products on which power, natural gas, emission allowances and coal are traded. Clearing and settlement of all transactions is done by the clearing house European Commodity Clearing AG (ECC).
