

The market data regarding all the products traded on the European Energy Exchange (EEX), EEX Power Derivatives and EPEX Spot and registered for OTC Clearing is available in an electronic format as EEX information products. In addition, the power plant data of the platform “Transparency in Energy Markets” is offered.

**The information products provide the following benefits:**

- Access to historic and current end-of-day market data via the FTP server (xml, csv, xls) or via the Download Center (xls) and submission of a daily Market Data Report via e-mail
- Submission of a Daily Transparency Report containing power plant data via e-mail and provision on the FTP server
- Daily sending of an SMS containing the prices from the markets

The information products can be compiled and subscribed for historic and current end-of-day market data in line with the following table and depending on which data is needed and how it is used.

Modular system of the information products >

| Right of use<br>Modules           | Info-User    | Info-Media                      | Info-Vendor                                    |
|-----------------------------------|--------------|---------------------------------|--|
|                                   | Internal use | Internal use & free publication | Internal use & further use subject to a charge |
| Power                             | EUR 400 p.a. | EUR 900 p.a.                    | On request                                     |
| Natural Gas/CO <sub>2</sub> /Coal | EUR 240 p.a. | EUR 550 p.a.                    | On request                                     |
| Transparency data                 | EUR 600 p.a. | EUR 900 p.a.                    | On request                                     |

(I and II provide information regarding contracts with different maturities.)

The SMS User comprises various products, which can be subscribed to for individual commodities, markets and contracts with different maturities.

## Daily Transparency Report

The Daily Transparency Report comprising approx. 50 pages contains central information regarding the availability of power plants and regarding the planned and actual feed-in by conventional power plants and renewable energies. This data is processed and plotted in graphs and, thus, permits simple analysis.

Example: actual production of renewable energy >

## Market Data Report

The daily Market Data Report comprising approx. 50 pages and includes comprehensive graphic representations of historical and current market data regarding all markets operated by EEX and its subsidiaries.

Example: hourly auction (Phelix) >
